

DON'T DELAY!

It's time to make prior authorization electronic with the **Medical ePA+™** application

Integrating the **Medical ePA+™** application from Mettle Solutions into your EHR, payer, or HHI system will streamline the entire prior authorization process with quick, electronic submissions.

You deserve an upgrade

- **Providers:** Virtually eliminate administrative burdens and delays in approvals and treatment
- **Payers:** get rid of slow, manual authorization reviews
- **HIHs:** Reduce concerns about the timely exchange and security of personal health information

What our customers say about us:

Mettle Solutions

"...went above and beyond."

"...are adaptable and able to problem solve."

and most importantly,

"I would recommend them."

The delay is real...and not just for the patients

88%

of medical services PAs are done manually, by phone or fax

91%

of physicians say PA usually or always causes care delays

79%

of physicians must repeat the PA process

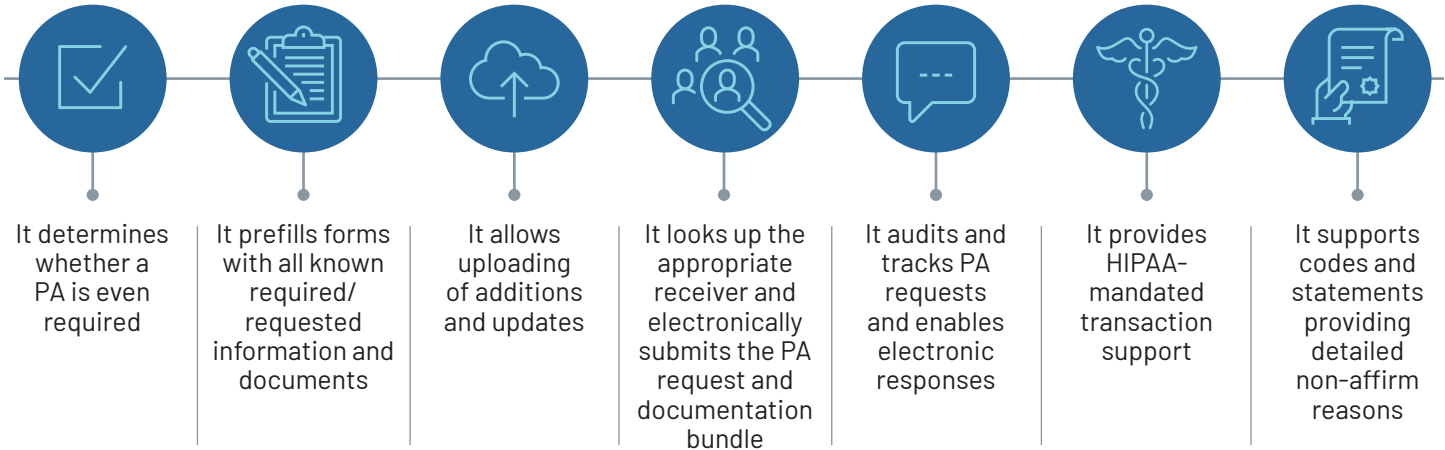

Physicians and their staff spend

TWO DAYS PER WEEK

just on PA

So how does the **Medical ePA+™** application ease the delay?

Time-saving benefits for everyone

Physicians

can see if PA is needed at the point of care, cutting out a step and saving time

Providers

have one application to submit quickly to all participating payers and plans

Providers & Staff

administration time is reduced by automatic fill and submission

HIHs

can be confident that electronic information exchange is secure and fast

Patients

receive timely treatments, relieving pain and suffering

EHR Vendors

have grateful customers, due to lower turnaround times and admin costs

Payers & Plans

electronically respond, streamlining workflow

Mettle Solutions stays in front of the standards, updating our easy-to-use software to help you streamline clunky processes like prior authorization. Our **Medical ePA+™** application is interoperable with all major EHRs, in-house software solutions, payer and HIH systems. You can use all your saved time and costs where they matter the most—elevating the quality and timeliness of patient care.
