The **MDx** solution allows electronic submission of additional medical documentation

Using paper to provide additional medical documentation is illogical. The **MDx™** solution is a SMART on FHIR application that allows quick and easy electronic submission of requested additional medical documentation to payers and claims review contractors. Providers and suppliers will reduce administrative burdens and speed up turnaround time, resulting in cost savings, greater efficiencies, and a higher quality of care for their patients.

Take this to your leader

- **Providers:** Pull and automatically pre-fill information and documentation directly from your EHR and submit to the appropriate payer, then track
- **EHR Vendors:** Offer as a service to your providers - have one application submitting to all participating payers
- **Payers:** Further automate the medical documentation review process

Resistance is futile...

2011

The year CMS enabled the Electronic Submission of Medical Documentation electronic system

2.5+ Million

The number of requests for additional medical documentation sent by CMS annually

64,000+

The number of providers already using esMD

\$1 Trillion

of healthcare spending goes towards administrative costs

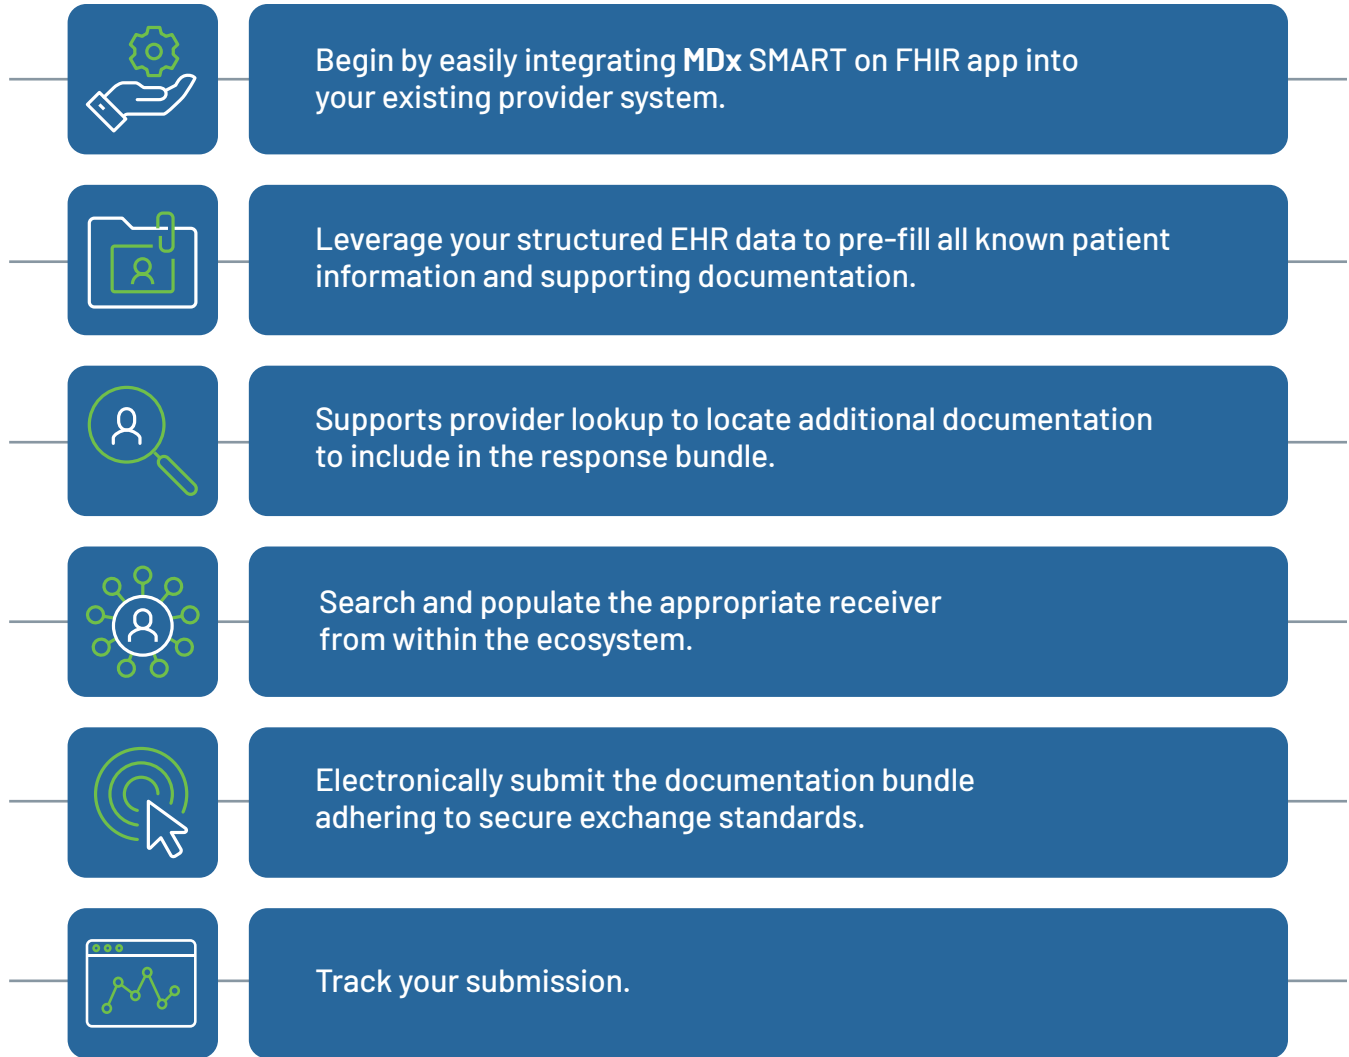

Improving efficiency and reducing costs is a

Top 3 Priority

among hospital leaders

Conclusion: Implementing the MDx application is the only rational response.

Operating procedure:

Now you're ready for deployment

Mettle Solutions has a long-established reputation for keeping abreast of standards and developing applications that streamline manual processes like submitting additional medical documentation to claims review. The **MDx** application saves time and costs, while helping to improve the quality of care patients receive.
